More than one million people suffer from a slip, trip, or fall each year and 17,700 died as a result of falls in 2005. They are the number one preventable cause of loss in the workplace and the leading cause of injury in public places. Completely revised, *Slip, Trip, and Fall Prevention: A Practical Handbook, Second Edition* demonstrates how, with proper design and maintenance, many of these events can be prevented. This well-illustrated and carefully researched volume covers standards and best practices for facility design, effective management control programs, test methods and standards relating to pedestrian safety, and slip resistance methods in the U. See what's new in the Second Edition: Enhanced photographs and tables, profiles of online resources, updated examples, case studies, and sidebars.
