Brand New Book ***** Print on Demand *****.Excerpt from *Insects and Insecticides* In order to intelligently apply insecticides, and to be able to judge whether one remedy or another will be more effective, it is necessary to understand something of the habits of the different insects attacking plants. These must be treated mechanically - dug out, and barriers or repellants provided to prevent them from regaining entrance into the trees. In the following pages the most successful remedies are given, but, under certain climatic conditions or in abnormal seasons, other steps may become necessary and advice from the State Commission of Horticulture should always be obtained in cases where any doubt exists. It should be remembered that the successful application of remedies is dependent upon the exercise of proper judgment. It is essential to first positively identify the insect to be destroyed, then to know the most effective remedy to use, and finally to apply it at the proper season. Promptness, thoroughness, and persistency, combined...
