PERIODIC INP/AIR STRUCTURES IN OPTICAL FILTER DEVICES

Shaker Verlag Mrz 2011, 2011. Taschenbuch. Book Condition: Neu. Neuware - Filter devices are a crucial element of analytic information systems which provide selective and evaluated signals when combined with detectors and processing units. Optical signals are advantageous due to their low susceptibility to perturbations, high potential bandwidth and fast propagation speed. Applications in the fields of data transmission or spectroscopic sensors are mainly located in the near infrared spectral range. In this thesis optical filter devices are investigated which...
