Reviews

This book is definitely not easy to get going on reading through but extremely exciting to see. I am quite late in start reading this one, but better then never. I am pleased to explain how here is the finest book i actually have read inside my individual daily life and may be he best book for ever.
(Mrs. Ellie Yost II)

ZAMBIA: MALARIA OPERATIONAL PLAN FY 2015 (PAPERBACK)

Createspace, United States, 2015. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book ***** Print on Demand *****.In May 2009, President Barack Obama announced the Global Health Initiative (GHI), a comprehensive effort to reduce the burden of disease and promote healthy communities and families around the world. Through the GHI, the United States Government will help partner countries improve health outcomes, with a particular focus on improving the health of women, newborns and children. The President's Malaria Initiative (PMI) is a core component of the GHI. PMI was launched in June 2005 as a 5-year, \$1.2 billion initiative to rapidly scale up malaria prevention and treatment interventions in high burden countries in sub-Saharan Africa. In December 2006, Zambia was selected as a PMI country. Since then, Zambia has received approximately \$151 million in PMI funding. Although there are signs of improvement, malaria continues to be a major cause of morbidity and mortality in Zambia and control of the disease remains one of the government's highest priorities. Overall, the number of reported malaria cases (clinical and confirmed) to the National Health Management Information System (HMIS) increased from 3,250,128 to 4,892,813 (2009- 2013). The reported number of outpatient department (OPD) visits increased from 13,697,003 in 2009 to 21,668,763 in 2012. There have been substantial declines over the past three years of reported inpatient malaria deaths for all ages with a decrease from 3.9 per 10,000 to 2.8 per 10,000 (2010-2012). Malaria parasite prevalence by smear microscopy has declined from 22 to 15 during the years of 2006 - 2012, but has remained relatively unchanged during the period of 2010 - 2012 (16 - 15) according to the 2012 Malaria Indicator Survey (MIS). Severe anemia also for children under the age of five years declined...
