

Creating Lifelong Math Science Learners: A Creative Science and Math Activity Book for Parents

Filesize: 2.27 MB

Reviews

Completely essential read ebook. It is among the most awesome book i actually have read. I am very happy to explain how this is basically the greatest book i actually have read in my individual existence and might be he best pdf for possibly.

(Prof. Alexandro Runolfsson)

CREATING LIFELONG MATH SCIENCE LEARNERS: A CREATIVE SCIENCE AND MATH ACTIVITY BOOK FOR PARENTS

Authorhouse. Paperback. Book Condition: New. Mary Taylor Overton (illustrator). Paperback. 256 pages. Dimensions: 10.8in. x 8.1in. x 0.6in. We live in a math and science based world. The math and science skills of American children have been on the decline. School systems have failed to address the science and math needs of children 2-6 years old. Research shows that these children are capable of learning more in-depth math and science skills than they are being given. Everything that a child sees, feels, tastes, smells, or hears is grounded in math and science concepts. Parents must take an active role in helping their children to become math and science literate. The book is filled with age-appropriate activities to help children to make math and science discoveries and connections about their world. The activities are open-ended allowing for participation by children of different skill levels. All of the activities are easy to follow and are based on how young children learn. Parents are encouraged to take their clues from their child's interest. There are suggested ideas as to how to approach and extend activities into further explorations. Creating Life-Long Math and Science Learners clearly puts parents in control. Parents need only open the book to find easy to follow activities to help children to explore the math and science based world around them. The activities are meant to be fun and a natural part of the child's learning experiences. Each major topic begins with Parent Background, Objectives, and a list of suggested vocabulary. Parent Background gives the rationale behind how young children learn specific skills. This section also includes basic facts for parents about the topic. Suggestions are given to help to maximize the child's learning and understanding. Throughout the book, vocabulary building is emphasized. Parents are shown how to incorporate specific vocabulary...
